

Dream Team Meeting  
May 21, 2020

Jenny Sanders, Dr. Valerie Wilson, Jodi Eppinette, Marcus Copeland, Kim Coker, Wayne Banks, Kyra Jerry, Courtney Haygood

The shared folder for the Intake Survey has been built. Kim Coker has built a test folder has and uploaded a completed intake form into an OneNote file. There was discussion about the use of OneNote. Dr. Wilson asked the group to make test entries into the document.

The group agreed to use the case management approach for the estimated 80 students. Five additional volunteers will be needed and five students will be assigned per individual. Interactions will be logged into the student OneNote file.

Next Steps:

- Test OneNote dummy file.
- Identify responses required for each question on form that have been marked as high priority. This should be in writing.
- For low priority questions, identify how those referrals will be done and what is expected of the department receiving the referral.
